

METSOVO

At an altitude of 1200 meters, we find Metsovo. This picturesque town perched on the Pindos range, that captures the visitor with its unique colors and spectacular images, follows the path of renovation, bringing together the past and the future.

Its mountainous terrain consists of strong elevations while many flora and fauna find refuge in the dense forests. The area is also rich in rivers, many of which rise here. Aaos, Arachthos, Pineios are some examples.

The majority of the inhabitants deal with the wood processing (carvings, furniture, iconostases, barrels, beehives etc), the cattle breeding and the cheese making. In fact the village, especially in the morning, has a unique odor of burned wood from the fire places and the ovens, fresh bread and cheese.

Museums, stone mansions, cobbled roads, traditional founts, monasteries, all harmoniously combined make Metsovo a wonderful shelter.
